ORDER

LEWIS A. KAPLAN, *District Judge*.

Defendant's motion for early termination of supervised release [Dkt. 75] is denied, substantially for the reasons stated in the government's opposition memorandum [Dkt. 76]. While the Court commends defendant for his apparent compliance with the terms of his supervised release, such compliance is the expectation. Without more, it is not a ground for early termination of the conditions imposed at the time of sentencing.

SO ORDERED.
